

Scientific

Here's what we study in science---

I'm going to give you the gist.

It's gems and germs

And rocks and worms

It's such a very long list.

What else do we study in science?

Gee, there is so much to tell.

It's genes and gels

And stars and gazelles.

And I can learn all of it well.

And after I study in science

Habitats, water cycle and all,

I head for the gym

And aim for the rim

And scientifically play basketball.
